► BOUNDARY PLANNING
TIMELINE

A photograph of a classroom scene. In the foreground, several students are seated at desks, viewed from behind, with their hands raised high in the air. They are wearing various casual clothing like t-shirts and a hoodie. In the background, a female teacher with dark hair, wearing a light-colored button-down shirt, stands smiling. Behind her is a large green chalkboard filled with mathematical equations and a graph. The equations include $2x^2 - 5x + 5 = 10$, $5 + 7(1 - 3) / 4 = 10$, and $2x^2 - 5x + 5 = 10$. The graph shows a downward-sloping line. The entire image has a soft, slightly faded aesthetic with a white border.

EXISTING BOUNDARIES

► B O U N D A R Y P L A N N I N G

U N D E R S T A N D I N G

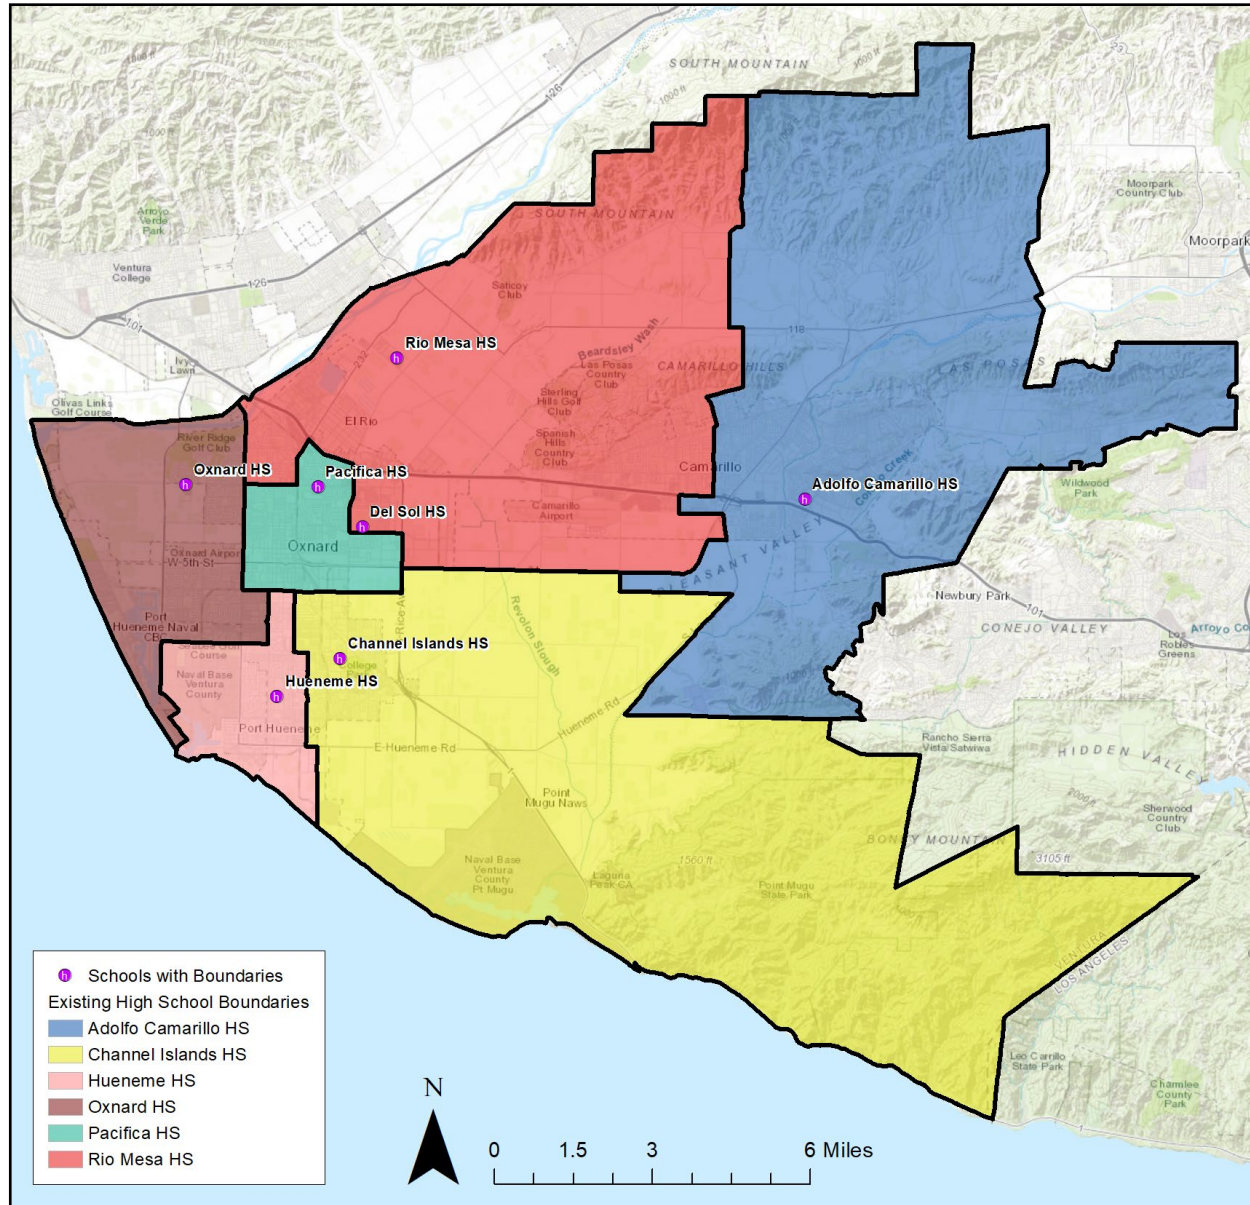

Enrollment – The number of students that live within a boundary, not including students attending a magnet school

Capacity – The number of students a facility can serve, this is a fluid number that is impacted by programs within each building

Utilization – Number of students divided by the capacity of the building

Free/Reduced Lunch %– Percentage of students coming from lower socioeconomic backgrounds, measured using student-level free/reduced lunch data

Projected utilizations represent the utilizations at each school, should no boundary changes be made.

A photograph of a classroom scene. In the foreground, several students are seated at desks, viewed from behind, with their hands raised high in the air. They are wearing various casual clothing like t-shirts and a hoodie. In the background, a female teacher with dark hair, wearing a light-colored blouse, stands in front of a large green chalkboard. The chalkboard contains some faint, illegible mathematical or scientific writing. The overall atmosphere is one of an active learning environment. The text 'PRELIMINARY BOUNDARY SCENARIO' is overlaid in the center in a white, serif font.
